Madison 6, Wisconsin

Dear Doctor Lederberg:

Please find enclosed a copy of the present draft of
"Cancer and Viruses" for "Research Reviews" in the Journal of the
American Medical Association.

I am taking the liberty of sending you this draft in
the hope that you may be willing to look through it and comment
critically.

The field is so large that it cannot be hoped to cover
the many important aspects of the work now in progress. However,
any suggestions that you may care to make in respect to desirable
changes, additions or omissions will be most welcome. I shall
much appreciate your kindness in giving me your help from your
vast knowledge in this field.

With many thanks and with kindest regards,

Yours sincerely,

B. L. Frank
